Headquarters	<a href="#">GAKIA</a> (Khan Dock)	Squadron Lead	CMDR <a href="#">Taliba Mudin</a> CMDR <a href="#">Reus Stert</a> CMDR <a href="#">Thorshammer1996</a>
Allegiance	Federation	Powerplay	Unknown/None

## PHASE I: INTEL GATHERING

This is the initiation mission for CMDR Munkil.

### Core Targets

Target	Intel/Background	Priority
Stay under the radar. The EPA must not learn anything about the RVES.	CMDR Jamison and CMDR MrField are known to the EPA	Critical
Intel about GAKIA and other near systems	Every bit of intel can be usefull!	Critical
Watch out for other Squadrons/player groups (And when found: are they bystanders, allied to the EPA or potential allies for our operation)	On Inara they have no allied squadrons listed but we can't rely on that	Normal
Find a suitable hideout system under control of an anarchy faction near GAKIA	L-Pad not necessary but a nice-to-have	High

### Secondary Targets

Target	Intel/Background	Priority
When contacted – play the stupid freshling or even the new recruit	They claim to educate new pilots, use that for your own advantage	Low

### Other Informations

The EPA is a german squadron and they only recruit german CMDRs and they are very conceited about their standing in Elite. You can easily use that for your own advantage – just be a little, unsecure german honeypot when getting in contact with them. When they offer you to join them it would be a great opportunity to get their intel and current objectives.

### Failure conditions

The mission has failed when the EPA learns that you belong to the RVES or they get a link to CMDR Dashel Jamison or CMDR MrField
